ELSEVIER International Journal of Mass Spectrometry and Ion Processes 149/150 (1995) vii–ix

International Journal of Mass Spectrometry and Ion Processes

CONTENTS

Special Issue: Honour Biography — David Smith

Foreword ... xi
David Smith ... xiii
Professor David Smith: List of publications ... xvii

Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system
D. Stöckigt, J. Hrušák and H. Schwarz (Berlin, Germany) ... 1
The reactivity of neat and mixed proton-bound ethanol clusters
F. Wang Yong and C. Lifshitz (Jerusalem, Israel) ... 13
Resonant formation of cluster anions containing SF_6 involving a pick-up experiment with argon and nitrogen clusters
V. Grill, O. Echt and T.D. Märk (Innsbruck, Austria) ... 27
Use of Rydberg atoms as a nanoscale laboratory to examine dissociative electron capture
R.A. Popple, C.D. Finch and F.B. Dunning (Houston, TX, USA) ... 37
Ion-induced electron emission from solid surfaces: information content of the electron number statistics
M. Vana, F. Aumayr, C. Lemell and HP. Winter (Wien, Austria) ... 45
Effect of temperature on the formation and autodestruction of parent anions
L.G. Christophorou and P.G. Datskos (Oak Ridge, TN, USA) ... 59
Effective intermolecular relaxation in $(C_6F_6)_n^-$ clusters: mechanism of $C_6F_6^-$ formation on low energy electron impact
O. Ingólfsson and E. Illenberger (Berlin, Germany) ... 79
Fates of the molecular anions of SF_6 and C_7F_{14} upon recombination with positive ions
J.A. Culbertson and E.P. Grimsrud (Bozeman, MT, USA) ... 87
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes
P.O. Staneke, G. Groothuis, S. Ingemann and N.M.M. Nibbering (Amsterdam, The Netherlands) ... 99
Thermal electron attachment to NF_3, PF_3, and PF_5
T.M. Miller, J.F. Friedman, A.E. Stevens Miller and J.F. Paulson (Hanscom, MA, USA) ... 111
Low energy electron attachment to brominated ethanes and ethylenes
T. Sunagawa and H. Shimamori (Fukui, Japan) ... 123
Recombination of H_3^+ and D_3^+ ions in a flowing afterglow plasma
T. Gougousi, R. Johnsen and M.F. Golde (Pittsburgh, PA, USA) ... 131
Super-dissociative recombination of H_2^+?
J.B.A. Mitchell (London, Ont., Canada), F.B. Yousif (Cuernavaca, Mexico), P.J.T. Van der Donk (London, Ont., Canada), T.J. Morgan (Middletown, CT, USA) and M.I. Chibisov (Moscow, Russia) ... 153
State-selected charge transfer reaction of $CO^+(X, v; A, v')$ with Ar
T. Imamura (Ibaraki, Japan) and I. Koyano (Hyohgo, Japan) ... 161
Combined infrared and ab initio study of the H_2–HN_2^+ complex
E.J. Bieske, S.A. Nizkorodov, F.R. Bennett and J.P. Maier (Basel, Switzerland) ... 167
Determination of cross-section for Ar^+–He elastic collisions from drift velocity data: Monte Carlo simulation
D. Trunec (Brno, Czech Republic) ... 179
Studies of the formation of cluster ions $NH_4^+ \cdot (NH_3)_n$, $n = 1$–4, using a high pressure flowing afterglow apparatus
J. Glosík, P. Zakouřil, V. Hanzal and V. Skalský (Prague, Czech Republic) ... 187
Ion/molecule reaction rate coefficients at translational temperatures below 5 K: selected bimolecular reactions of $C_2H_2^+$ and NH_4^+
M.A. Smith and M. Hawley (Tucson, AZ, USA) ... 199
Vibrational relaxation in NO^+–He: accurate quantum mechanical study
S.K. Pogrebnya, A. Kliesch, D.C. Clary (Cambridge, UK) and M. Cacciatore (Bari, Italy) ... 207

Carbon cluster anions: structure and growth from C_5^- to C_{62}^-
N.G. Gotts, G. von Helden and M.T. Bowers (Santa Barbara, CA, USA) 217
Neutral/neutral reactions without barriers: comparisons with ion/molecule systems and their possible role in the chemistry of interstellar clouds
I.W.M. Smith (Birmingham, UK) 231
The association reaction $C_2H_3^+ + CO$ and interstellar propynal
G.B.I. Scott, D.A. Fairley, C.G. Freeman, R.G.A.R. Maclagan and M.J. McEwan (Christchurch, New Zealand) 251
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene
L.J. Chyall and R.R. Squires (West Lafayette, IN, USA) 257
Collision-induced dissociation of $N_3^+(X^3\Sigma^-)$ with Ne, Ar, Kr, and Xe
C.L. Haynes, W. Freysinger and P.B. Armentrout (Salt Lake City, UT, USA) 267
Electron impact ionization of spatially oriented CH_3Cl and CCl_3H
C.G. Aitken, D.A. Blunt and P.W. Harland (Christchurch, New Zealand) 279
Chemistry of atmospheric ions reacting with fully fluorinated compounds
R.A. Morris, A.A. Viggiano, S.T. Arnold and J.F. Paulson (Hanscom, MA, USA) 287
An on-line Langmuir probe technique for the study of afterglow plasmas
P. Španěl (Innsbruck, Austria) 299
A crossed beam high resolution study of dissociative electron attachment to CCl_4
S. Matejcik, A. Kiendler, A. Stamatovic and T.D. Märk (Innsbruck, Austria) 311
The interstellar gas phase production of highly complex hydrocarbons: construction of a model
R.P.A. Bettens and E. Herbst (Columbus, OH, USA) 321
Molecular processes in CH_4–H_2 plasmas diluted with rare gases: reactions of X^* atoms and X^+ ions (X = Ne and Ar) with methane molecules
P. Tosi, D. Bassi (Trento, Italy), B. Brunetti and F. Vecchiocattivi (Perugia, Italy) 345
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules
V. Aquilanti, D. Ascenzi, D. Cappelletti and F. Pirani (Perugia, Italy) 355
On the dynamics of the reaction of positive hydrogen cluster ions (H_5^+ to H_{23}^+) with para and normal hydrogen at 10 K
W. Paul, B. Lücke, S. Schlemmer and D. Gerlich (Chemnitz, Germany) 373
The chemistry of complex molecules in interstellar clouds
T.J. Millar (Manchester, UK), E. Roueff (Meudon, France), S.B. Charnley (Berkeley, CA, USA) and S.D. Rodgers (Manchester, UK) 389
Dissociative recombination in ion storage rings
M. Larsson (Stockholm, Sweden) 403
Metastable decay of propane ($CH_3CD_2CH_3$)- and argon/propane-cluster ions induced by isomerization of a propyl ion core and fragmentation patterns of propane ions in the cluster environment
M. Foltin, Z. Herman and T.D. Märk (Innsbruck, Austria) 415
Electron attachment to haloacetonitriles, 295–556 K
J.M. Van Doren, W.M. Foley, J.E. McClellan (Worcester, MA, USA), T.M. Miller (Hanscom, MA, USA), A.D. Kowalak (Lowell, MA, USA) and A.A. Viggiano (Hanscom, MA, USA) 423
Ion/molecule reactions in astrophysical plasmas
A. Dalgarno (Cambridge, MA, USA) 429
Simulation of a discrete electrode detector array performance
D.J. Narayan, D.P. Langstaff and K. Birkinshaw (Aberystwyth, UK) 439
Electron/ion recombination in dense gaseous Xe
M. Ukai, T. Odaka, H. Yamada, K. Isoda (Tokyo, Japan), K. Shinsaka (Ishikawa, Japan), N. Kouchi and Y. Hatano (Tokyo, Japan) 451
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe
S. Kato, V.M. Bierbaum and S.R. Leone (Boulder, CO, USA) 469
Radiative lifetimes for an ion of astrophysical interest: HCO^+
G. Mauclaire, J. Lemaire, M. Heninger, S. Fenistein, D.C. Parent and R. Marx (Orsay, France) 487
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with C_2H_2 and C_6H_6
J. Glosík, P. Zakouřil, V. Skalský (Prague, Czech Republic) and W. Lindinger (Innsbruck, Austria) 499
Fragmentation spectroscopy of photoionized $Fe(CO)_5$: a molecular model for a heterogeneous cluster
M. Fieber-Erdmann, E. Holub-Krappe, G. Bröker (Berlin, Germany), G. Dujardin (Orsay, France) and A. Ding (Berlin, Germany) 513
Kinetic study of protonated methanol clusters with acetonitrile
X. Zhang and A.W. Castleman, Jr. (University Park, PA, USA) 521

Charge transfer reactions between D^+, O^+, Ar^+, Kr^+ and Xe^+ with CH_4, C_2H_6 and C_3H_8 at relative energies 1–10 eV
P.J. Gale, J.F. Paulson and M. Henchman (Waltham, MA, USA) 529
Reactions of Fe^+ coordinated to the π-donating ligands C_2H_4, c-C_5H_5, C_6H_6 and C_{60} with N_2O and CO: probing the bonding in $(C_{60})Fe^+$
V. Baranov and D.K. Bohme (North York, Ont., Canada) 543
Relating ion/neutral reaction rate coefficients and cross-sections by accessing a database for ion transport properties
L.A. Viehland and C.C. Kirkpatrick (Cahokia, IL, USA) 555
FALP and CRESU studies of ionic reactions
B.R. Rowe, A. Canosa and V. Le Page (Rennes, France) 573
The semiclassical–classical path theory of direct electron–ion dissociative recombination and $e^- + H_3^+$ recombination
M.R. Flannery (Atlanta, GA, USA) 597
Proton transfer reaction mass spectrometry: on-line trace gas analysis at the ppb level
A. Hansel, A. Jordan, R. Holzinger, P. Prazeller, W. Vogel and W. Lindinger (Innsbruck, Austria) 609
Large-scale coupled cluster calculations for the linear carbon anions C_3^-, C_4^-, C_7^- and C_{10}^-
S. Schmatz and P. Botschwina (Göttingen, Germany) 621
